BENEFIT GUIDE

HPE-8000X, The Expert Edger

New Features
& Sales Points

Product Types & System Configurations

Product Type	Specification			
	Voltage	Step Bevel	Wheel Type	Color
HPE-8000X 220V	220V	○	RPGA	Black
HPE-8000X 110V	110V	○	RPA	Black
HPE-8000XN 220V	220V	X	RPGA	Black
HPE-8000XN 220V (White)	220V	X	RPGA	White
HPE-8000XN 110V	110V	X	RPA	Black

NEW KEY FEATURES

❖ Platform & Mechanism Improvements

Vacuum Interface

High Resolution LCD

- 1024 x 768 (9.7")

High Speed Platform

- GUI : 1 GHz
- Motor : 120 MHz

Powerful Rotation

- X1.7 stronger motor
- X2.5 longer durability

SBG w/ Step Beveling (8000X-Only)

- Step beveling cutter
- ~~Milling cutter~~
- X2.5 higher RPM
- X2 stronger motor
- Belt-driven spindle
- No Stroke Calibration

Secure Window

- Mechanical sensor
- Shock absorbing seal
- X2.5 longer lifetime
- Forcing Mode

Robust Feeler

- Tip-bending structure
- X10 more durable tips
- Dual sealing

Smart & Stable Clamp

- Adaptive clamp chuck
- Position-sensor-based clamping

High Performance Wheel

- Ø125, RPGA/RPA type
- 800W, 2HP(Inverter)
- Enhanced polishing quality (esp. w/ poly)

NEW KEY FEATURES

New Features & Sales Points

❖ Platform & Mechanism Improvements - Details

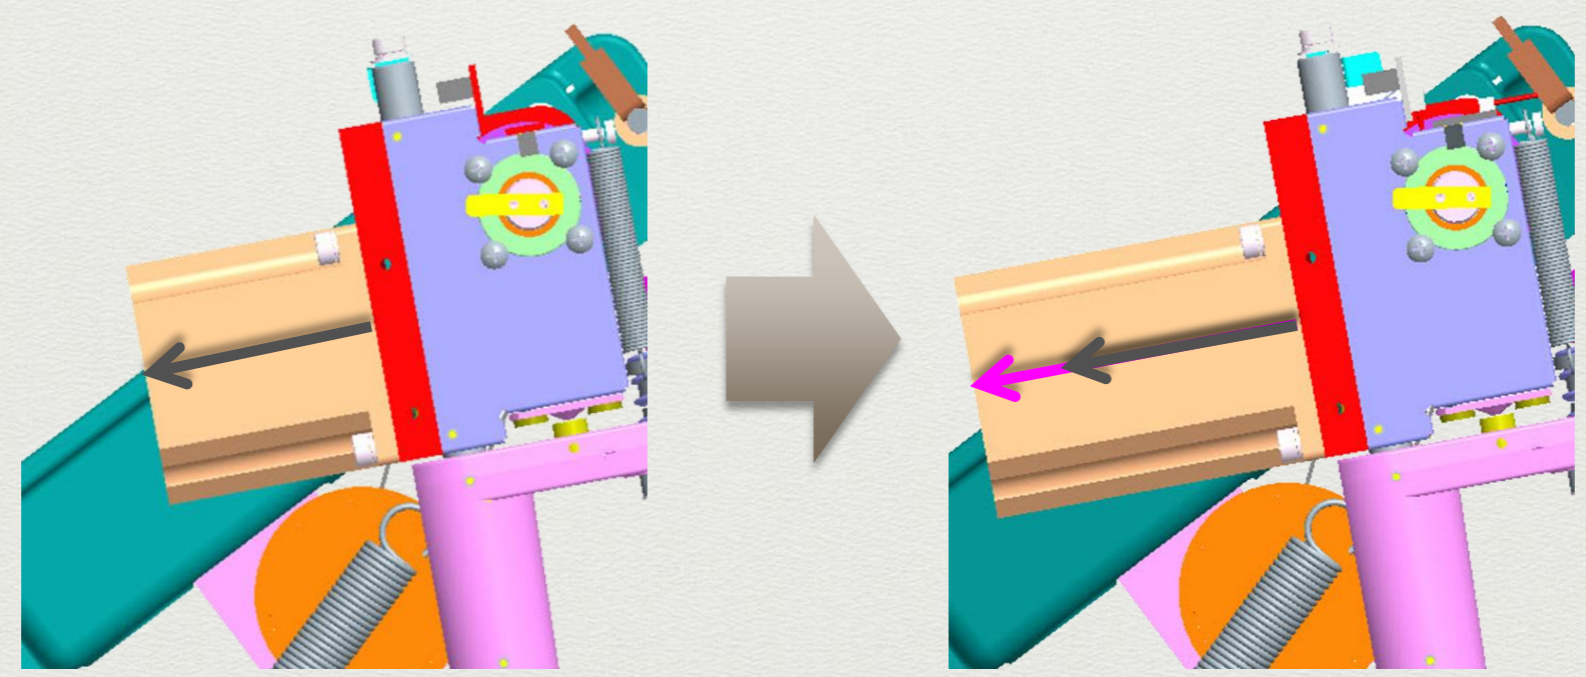

Smart & Stable Clamp

- Adaptive chuck
- Position-sensor-based clamping

Powerful Rotation

- X1.7 stronger motor
- X2.5 longer durability

- Guarantees anti-axis slippage
- Prevents lens distortion and coating damage
- Implements faster feeling and lens-cutting

[8000]

[8000X/XN]

NEW KEY FEATURES

New Features
& Sales Points

❖ Platform & Mechanism Improvements - Details

SBG w/ Step Beveling (8000X-Only)

- Step beveling cutter
- X2.5 higher RPM
- X2 stronger motor
- Belt-driven spindle (applied to 8000XN also)

- Quite quieter operation by the belt-driven spindle mechanism
- Faster lens-processing with higher RPM motor
- Robust and fast step bevel cutting by an ultrahard blade

[8000XN w/ No Step Bevel Cutter]

[8000X w/ Step Bevel Cutter]

NEW KEY FEATURES

❖ Platform & Mechanism Improvements - Details

High Performance Wheel

- Ø125, RPGA/RPA type
- 800W, 2HP(Inverter)
- Enhanced polishing quality

- RPGA wheel configuration for 220V
- RPA wheel configuration for 110V
- Polishing quality enhanced by introducing new wheel design and material (especially for poly lenses)
- Much easier maintenance with polishing

[8000 RPA]

[8000X/XN RPA]

[8000 RPGA]

[8000X/XN RPGA]

NEW KEY FEATURES

❖ Functional Improvements

Edging Capability

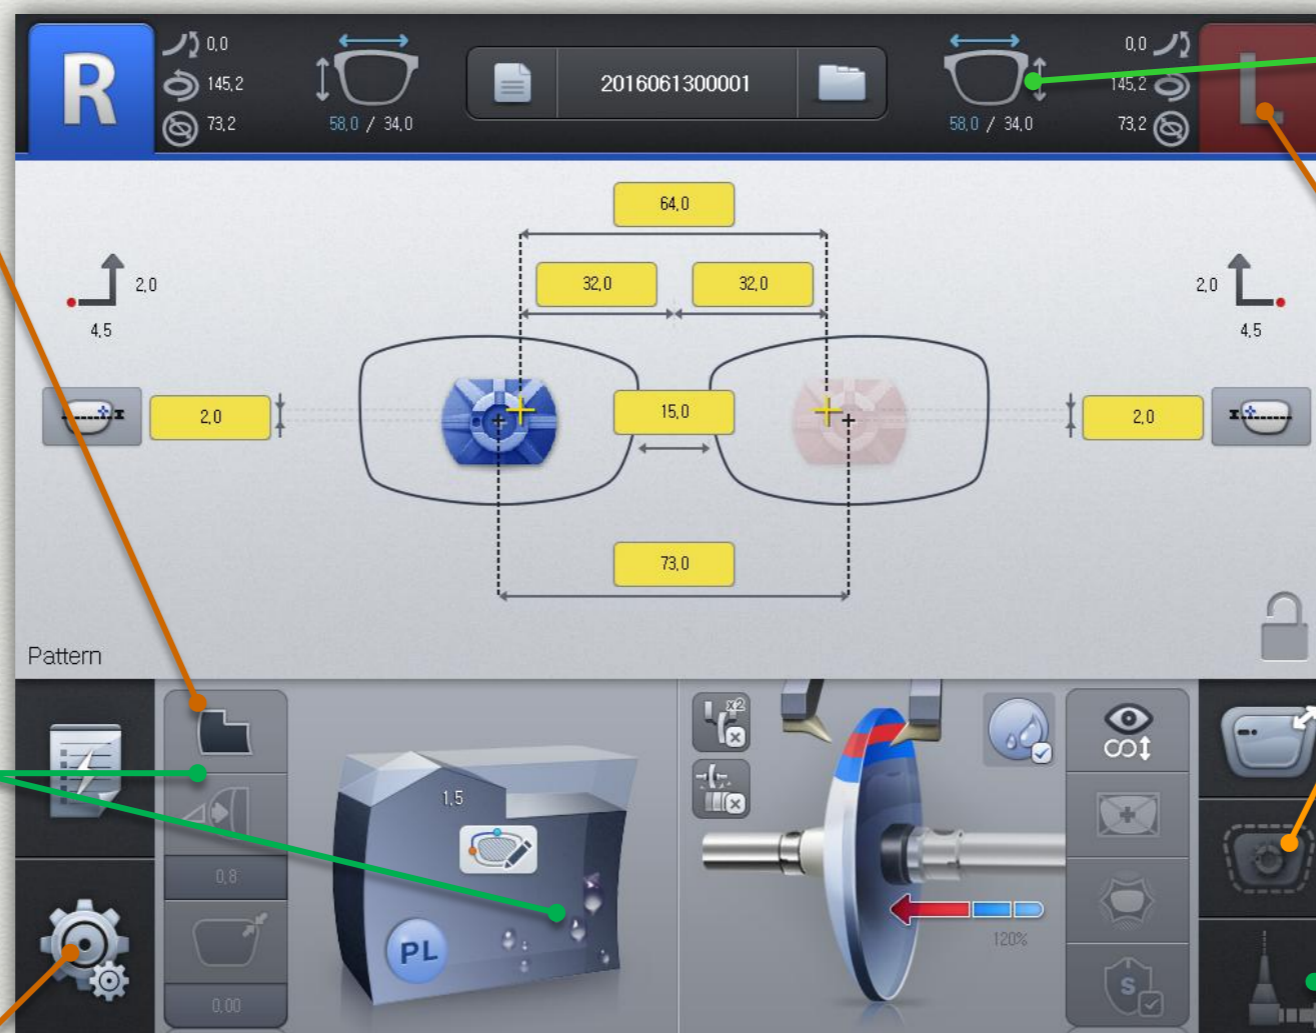

- Concave Rimless
- Mini Bevel
- Partial Bevel
- Partial Grooving
- Dual Grooving
- Hybrid Grooving
- **Asymmetric Bevel**
- **Semi-U Bevel**
- **Step Bevel ***

Edging Options

- Hydrophobic Mode
- Auto Position
- Manual Position
- Position Simulation
- Absolute Basecurve

Diagnostic Functions

- **Sensor tests**
- **Movement tests**

Enhanced Fitting

- Auto Fitting
- Auto Modification

DCS Compatibility

- **DCS(OMA) Import**

Smarter Retouch

- Grooving option
- Adding safety bevel
- Adding grooving
- Adding polishing
- Adding holes
- **Step Bevel width ***
- **Step Bevel height ***

Special Drilling

- Easy Click
- Scan & Cut

*) A feature which is supported by 8000X only!

NEW KEY FEATURES

❖ Functional Improvements Details

Edging Capability

- Concave Rimless
- Mini Bevel
- Partial Bevel
- Partial Grooving
- Dual Grooving
- Hybrid Grooving
- Variable Asymmetric Bevel
- Variable Semi-U Bevel
- Step Bevel (8000X-Only)

- Asymmetric and Semi-U bevel cutting promise better and more aesthetic fitting for high-wrap rims by allowing to set rear height variable around lens edge
- Newly introduced Step Bevel cutting makes the best lens fit into high-wrap sunglasses even with special shape cuttings such as ventilation holes *

*) Specification - lens curve ≤ 6, step bevel height ≤ 6mm, otherwise it may require manual retouch by the customer!

NEW KEY FEATURES

New Features
& Sales Points

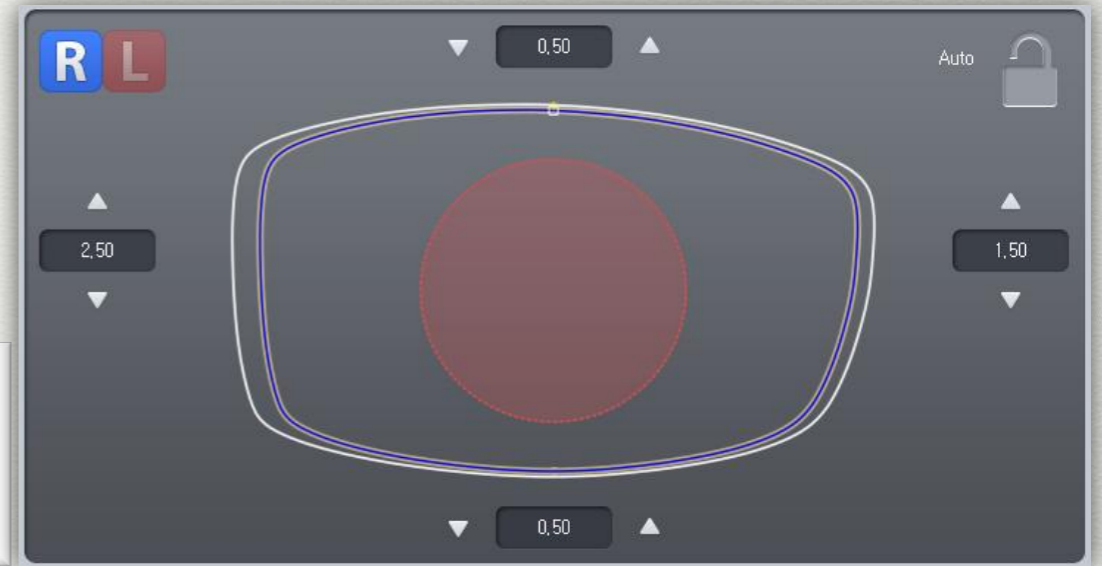

❖ Functional Improvements Details

Edging Capability

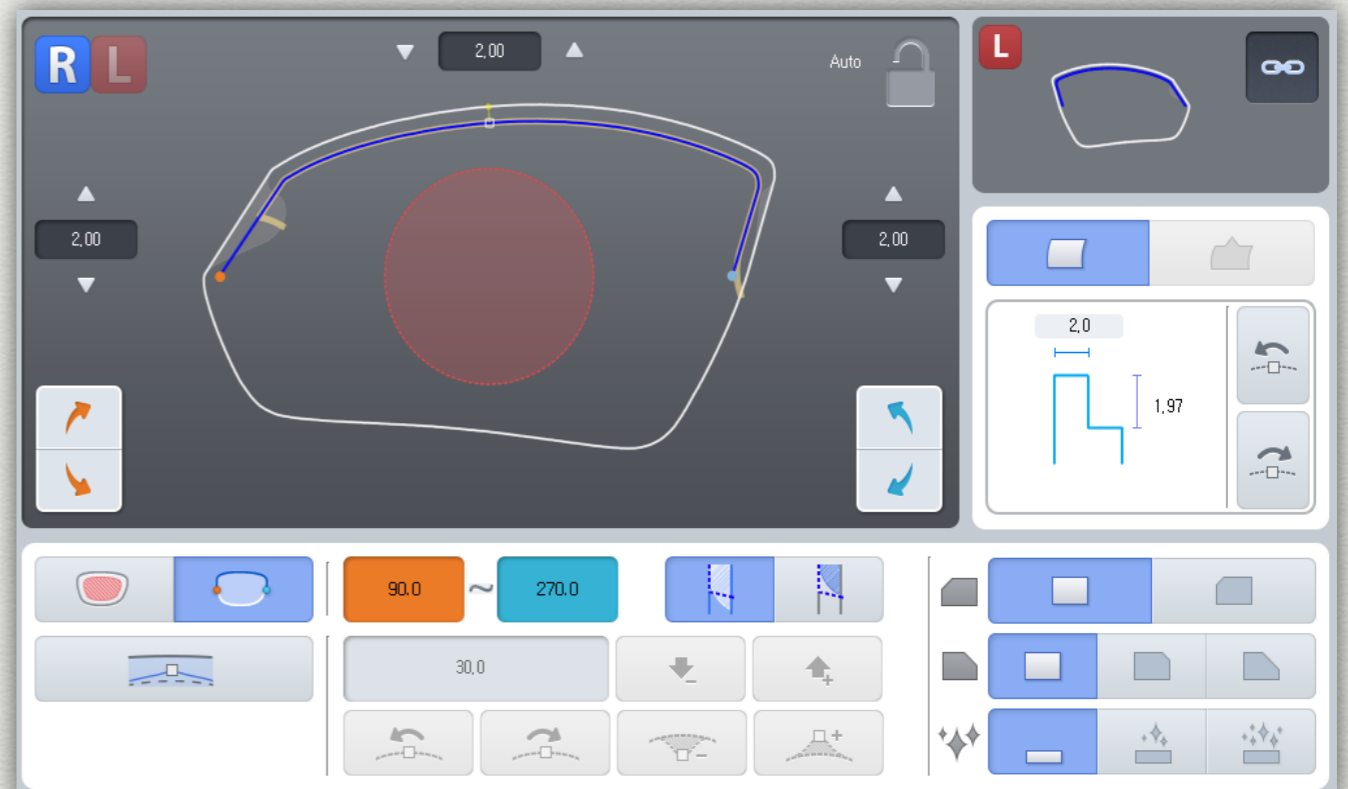

- Concave Rimless
- Mini Bevel
- Partial Bevel
- Partial Grooving
- Dual Grooving
- Hybrid Grooving
- **Variable Asymmetric Bevel**
- **Variable Semi-U Bevel**
- **Step Bevel ***

[Variable
Asymmetric
Bevel]

[Step Bevel]

*) A feature which is supported by 8000X only!

NEW KEY FEATURES

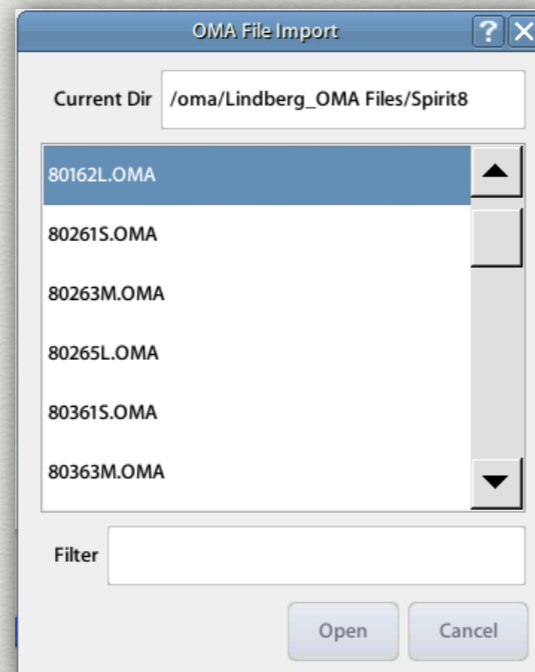

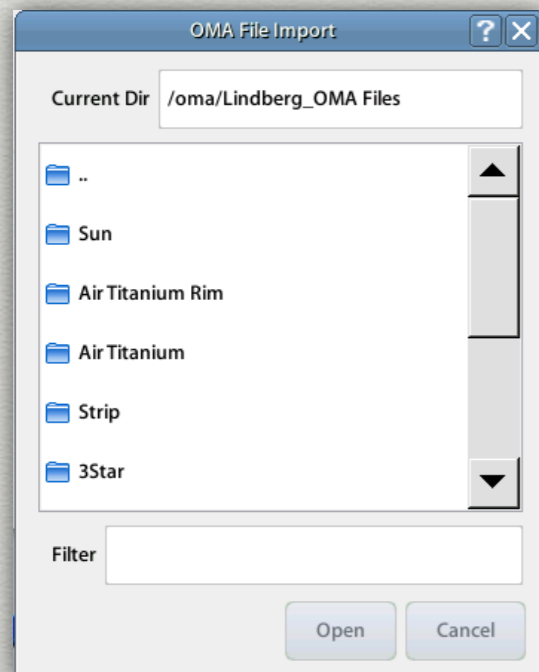

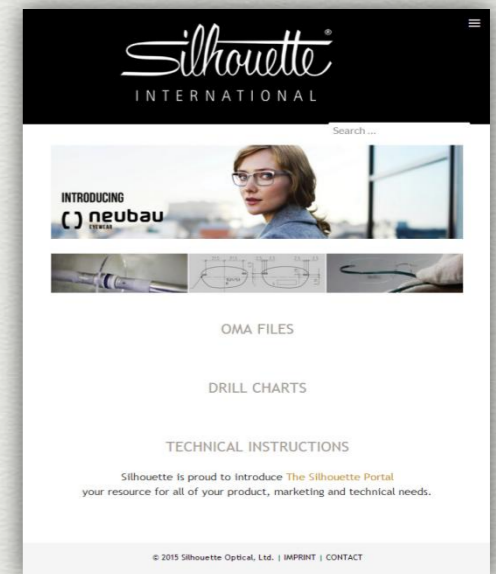

New Features
& Sales Points

❖ Functional Improvements Details

DCS Compatibility

- Direct DCS(OMA) Import

- Importing DCS(OMA) job files directly from SD card without via PC conversion utility - Thousands of job files provided by frame manufacturers can be ready-to-cut in a minute! Even including drilling!
- Exploiting manufacturer-providing job files not only saves time greatly but also guarantees degree of precision in job layout!

NEW KEY FEATURES

❖ Functional Improvements Details

- Edging Options**
- Hydrophobic Mode
 - Auto Position
 - Position Simulation
 - Manual Position
 - Absolute Base curve

Hydrophobic Mode

Hydrophobic Mode OFF ON

Default Value

Roughing Mode SPIRAL

Safety Mode OFF ON

Rotation Speed (%) 70

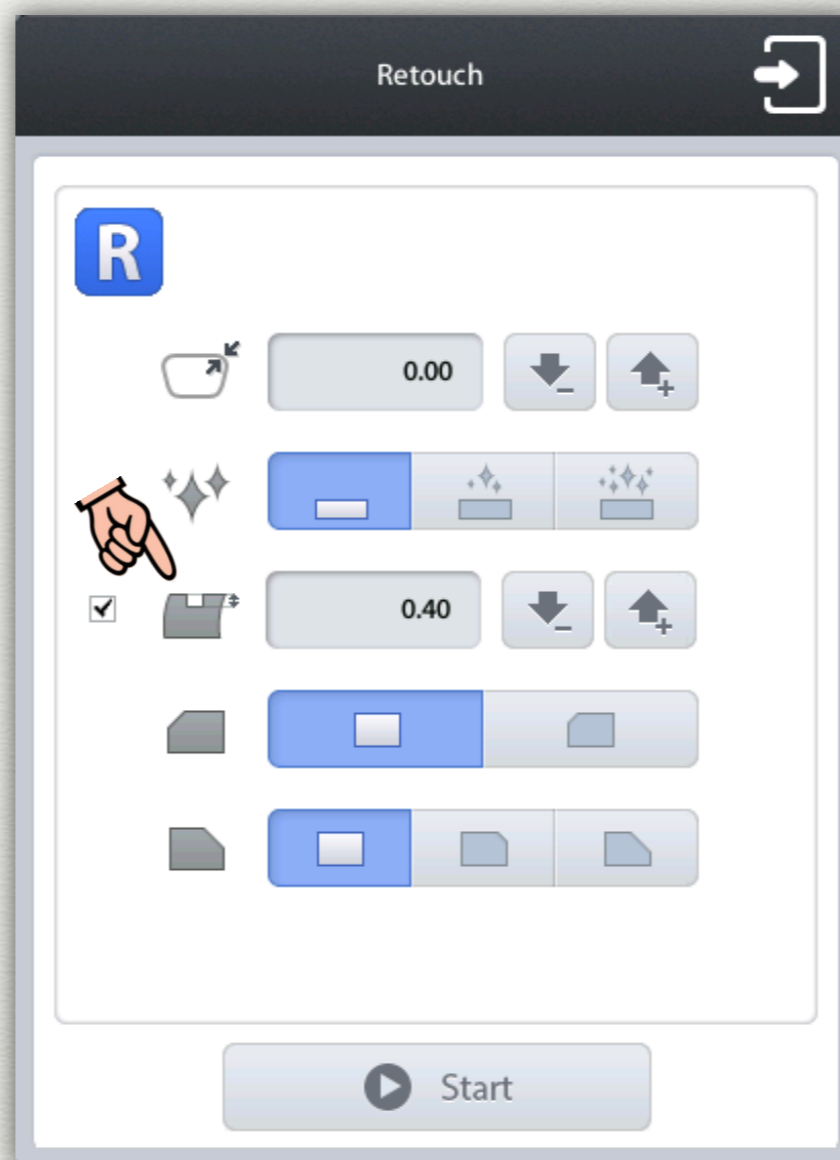

Clamp Pressure 120

NEW KEY FEATURES

❖ Functional Improvements Details

Special Drilling

- Easy Click
- Scan & Cut*¹

Smarter Retouch

- Grooving option
- Adding safety bevel
- Adding grooving
- Adding polishing
- Adding holes
- **Step Bevel width** *
- **Step Bevel height** *

*) A feature which is supported by 8000X only!

NEW KEY FEATURES

❖ Engineers' Benefits

Maintenance

- Retouch-and-Adjustment
 - Polishing wheel size
 - Grooving depth
 - Safety bevel amount
- Axis Jig Package
 - Line Maker
 - Axis Alignment
 - Axis Alignment(acryl)
 - Alignment Plate

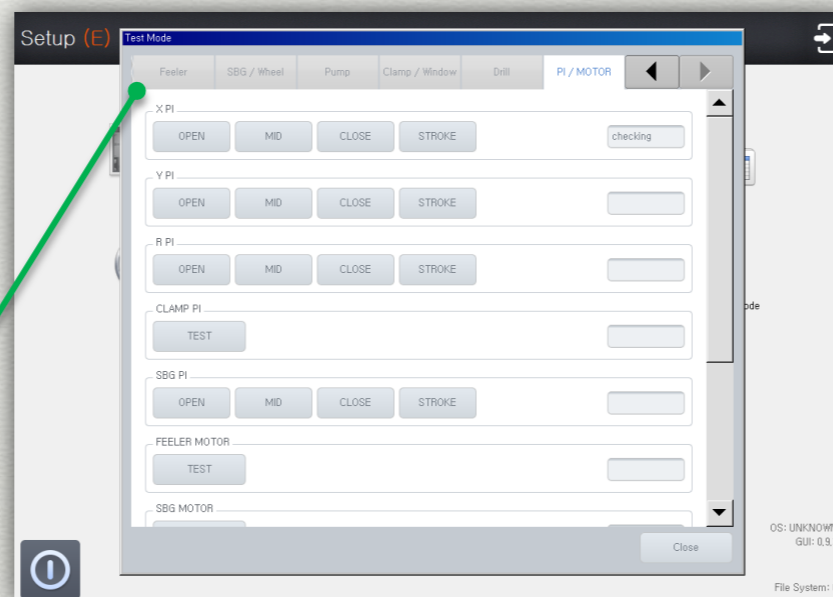

Technical Support

- Window Simulator
 - Per-PC License

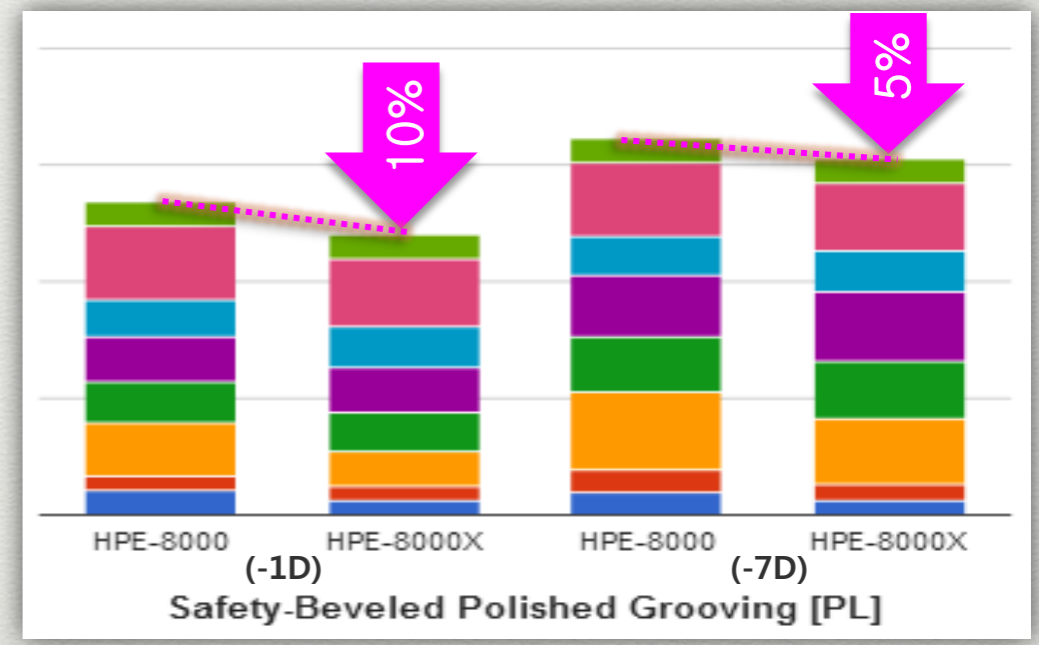

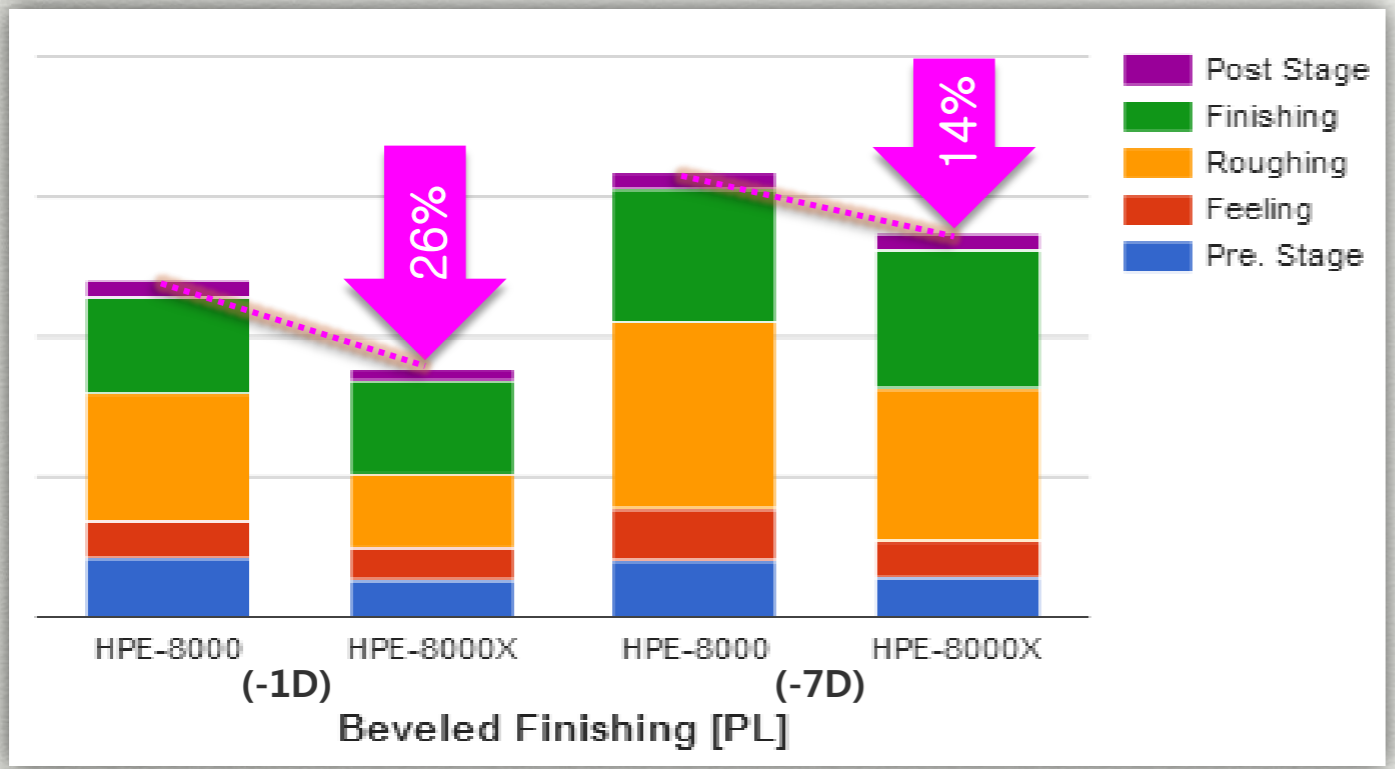

Troubleshooting

- Self-Diagnostics
 - Sensor tests
 - Movement tests
 - Automatic execution
- Auto Recovery on the failure of s/w upgrade

SALES POINTS OF PERFORMANCE

❖ Processing Time

* PL=1.61, HI = 1.67

SALES POINTS OF FEATURES

❖ Features Summary

Feature	Specification & Details
11 different edging types	Bevel, Rimless, Grooving, Mini Bevel, Variable Asymmetric Bevel, Variable Semi-U Bevel, Step Bevel* , Partial Bevel, Partial Grooving, Dual Grooving, Hybrid Grooving
3 different feeling positions with 3 different modes and 1 option	Feeling Position: normal, frame change, shortage check Feeling Modes : both sides, front-only, rear-only Feeling Option : feeling after roughing
Hydrophobic mode – setting all the edging options for axis-safe cutting by one click of a button	Roughing mode, Safety mode, Clamp pressure, Rotation speed
6 different types of edging position	AUTO, MANUAL, Base Curve(absolute), Percent, Front Offset, Rear Offset
Predefined 3 level of pressure control	Predefined level : High Pressure, Mid Pressure, Low Pressure Manual input : 50 ~ 150%
4 types of retouch option	Size, Polishing, Grooving, Safety Bevel Any of the edging option missed by mistake can be added and processed in the retouch mode! Grooving retouch can be turned off to make it shallower. Asymmetric and Step Bevel can also be retouched.
Retouch support for history jobs	Up to latest 3 jobs
Direct DCS(OMA) import	DCS job file includes frame shape, FPD, finishing style, lens material, drill coordination, and etc. Maintaining DCS(OMA) files in folder-base removes all the concerns about filename duplication!

*) A feature which is supported by 8000X only!

SALES POINTS OF FEATURES

❖ Features Summary

Feature	Specification & Details
Fixing and modifying frame shape	R/L shape-switching, R/L shape-mirroring, free modification by the Digital Pattern – shape modification by directions, ratio, rotation, and partial edition.
Easy-to-use hole editor	Drilling type: hole, slot, notch Coordination: center, edge, box User-definable presets, easy mover, saving/loading drill data, mirroring, hole retouch, undo/redo
Multiple job handling and concurrent processing	Job Manager provides handling on waiting jobs, processing jobs, processed jobs, and saved jobs list! Preparing next jobs while edging a job.
Parallel processing of edging and drilling* job	Automatic angle (0 ~ 30°) Wrap removal mode High quality mode
Easy Click* – the easiest way to make Chemistrie clips	A set of jobs including primary, sun, and reader lens is automatically created. Drilling-only mode for adding clips on existing glasses!
Scan & Cut* – the freedom of creating special-shape frames	
DCS(OMA) compatible	Compatible with VCA DCS V3.04
Barcode reader support	Job number input, Job search, Job request

*) A feature which is supported when the edger is connected with an HDM-8000 external driller!
